[EXTERNAL]

Hi Juliana,

Please see copies of our correspondence to the Cazenovia and Morrisville-Eaton Central School Districts, below and attached, requesting bus route information for Exhibit 16. These records can be added to your Correspondence Log for Appendix 2-A, as discussed yesterday.

The attached correspondence to Morrisville-Eaton CSD was sent to Chris Doroshenko, Transportation Supervisor, on November 17, 2023.

To date, no responses have been received. We will be following up with both school districts by phone this week.

Thanks,

Greg Redling

Subject: Hoffman Falls Wind Project Consultation

Good afternoon Karen,

As you may be aware, Hoffman Falls Wind LLC is currently seeking approval under Section 94-c of the NYS Executive Law for the Hoffman Falls Wind Project (Project), a proposed up to 100-megawatt (MW) wind energy generating facility in the Towns of Eaton, Fenner, Nelson, and Smithfield, Madison County, New York. As shown in the attach map, portions of the Project fall within your school district. Pursuant to 19 NYCRR 900-2.17(e), we are requesting information on established school bus routes and hours of operation. This information will be folded into our transportation effects analysis to ensure the construction and operation of the Project avoids, minimizes, and mitigates any potential transportation concerns. Please reach out via the contact information below with any information you can provide on school bus routes and hours of operation.

Thanks,

Greg Redling

[EXTERNAL SENDER]

Hi Daniel:

We received Colin's request for any recently approved and pending land use developments within the Town of Cazenovia. I reviewed our records starting with January 1, 2020 and only included projects that fell within the area you depicted on your map.

I noticed the Village of Cazenovia is entirely within your area of interest. They are a separate entity so you will need to contact them directly.

Please let me know if you have any questions.

Have a great day!

-Connie

Dear Supervisor Zupan,

As you may know, Liberty Renewables, Inc. (Liberty) will soon file an Application under Section 94(c) of the New York Executive Law to construct an approximately 100-MW wind project in the Towns of Fenner, Nelson, Eaton, and Smithfield in Madison, County, New York (the Project). The Section 94(c) regulations require Liberty to identify and map current and proposed land uses within 5 miles of the Project. On behalf of Liberty Renewables, Environmental Design and Research, D.P.C. (EDR) is soliciting information regarding any proposed or recently approved land use developments located within 5 miles of the Project. For further details, please see the attached map and information request letter, which will be arriving by mail as well. Thank you in advance for any information you can provide.

Thank you,

Colin Buckowski

[EXTERNAL SENDER]

Current projects approved within the 5 mile radius of the solar project include the Burke Meadows housing development and the Caz Barns apartment complex. Both of these projects are in the construction phase currently. There is also a proposed mixed use residential/retail redevelopment project that has been under preliminary review located at 99 and 103 Albany St.

All three should be considered for potential impacts per Section 94-c Application.

Thank you

Bill

Hamilton Municipal Airport Consultation

November 13, 2023

Hamilton Municipal Airport
6610 Wings Way
Hamilton, NY 13346

RE: Hoffman Falls Wind Project

To Whom It May Concern:

As you may be aware, Hoffman Falls Wind LLC (the Applicant), a wholly owned subsidiary of Liberty Renewables Inc., is currently seeking approval under Section 94-c Regulations for the Hoffman Falls Wind Project (the Project), a proposed up to 100-megawatt wind-powered electric generating facility in the Towns of Eaton, Fenner, Nelson, and Smithfield, Madison County, New York. Pursuant to 19 NYCRR 900-2.17(f)(2), you are being notified of the construction of this project.

As shown in the attached map, the Project is located northwest of the Hamilton Municipal Airport and will consist of up to 24 turbines. The maximum turbine height currently being considered is 656 feet (200 meters). The nearest turbine is located approximately 5.8 miles northwest of the Hamilton Municipal Airport's primary runway.

The Applicant has already submitted a Notice of Proposed Construction or Alteration with the Federal Aviation Administration (FAA) on August 24, 2023. The FAA has not yet issued determinations for these filings. The Applicant has also filed a request to the FAA on September 1, 2023, to seek a determination approving the use of an Aircraft Detection Lighting System (ADLS) as a wind turbine lighting option. The Applicant has also entered discussions with the Department of Defense (DoD), acting through the Military Aviation and Installation Assurance Siting Clearinghouse and the Department of the Air Force (DAF), acting through the Deputy Assistant Secretary of the Air Force for Installations to mitigate any potential adverse impact and to minimize risks to national security while allowing the Project to proceed with development. Additionally, the Applicant informed the National Telecommunications and Information Administration (NTIA) of the Project on August 29, 2023, and received a formal response on November 6, 2023, citing that no reviewing agencies had issues with turbine placement and that the project appeared to be radar neutral. No further contact with the Applicant was requested by the NTIA.

The Applicant anticipates filing the Section 94-c Application for this Project with the Office of Renewable Energy Siting in January 2024. We are requesting any questions or comments regarding the Project. Please direct questions or comments to me, Meg Lee, by phone at 860-575-0680, or by email at mlee@liberty-renewables.com. For further information and updates on the Project, please see the Project website: <https://liberty-renewables.com/hoffmanfallswind/>.

We appreciate your time and assistance with this effort.

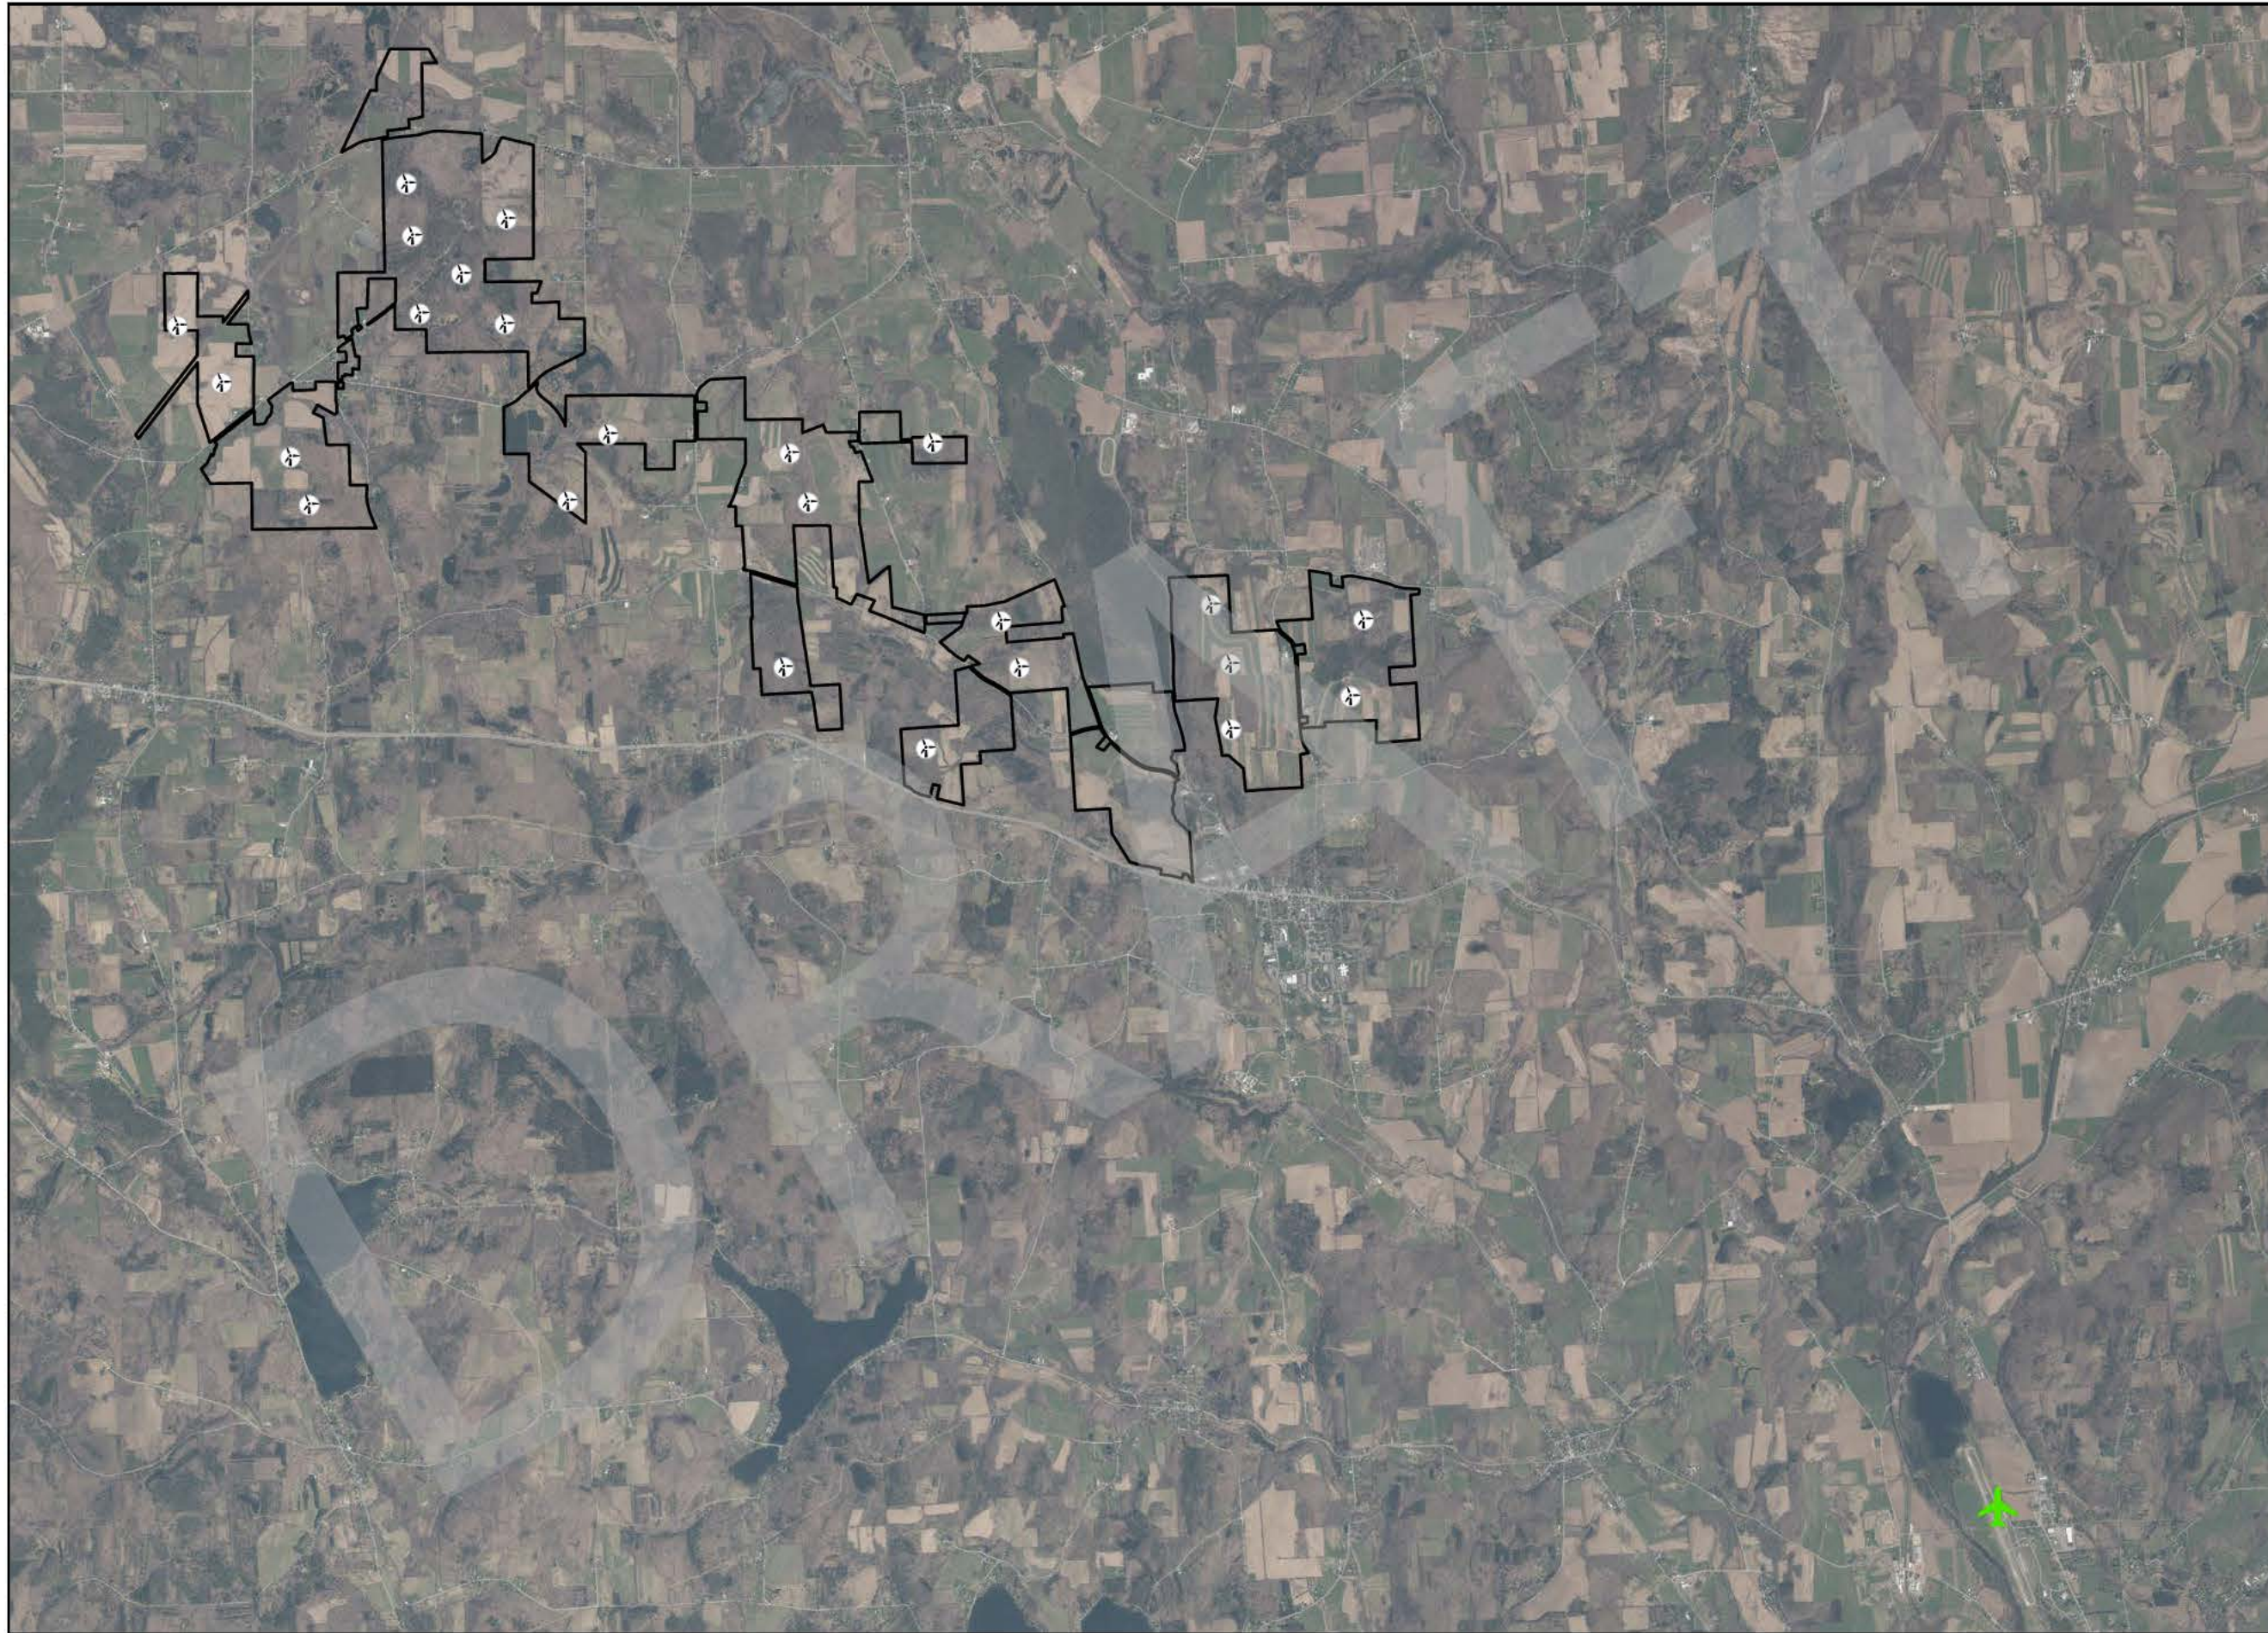

Sincerely,

A handwritten signature in black ink, appearing to read "M Lee".

Hi Alice,

It looks like the scope of this NDA has been narrowed to just Madison County. Would it be possible to revert back to the previous scope (statewide)? EDR regularly completes these analyses across New York State and it would simplify things to keep the scope of this NDA statewide to ensure a new NDA does not need to be signed for each county where this information is requested by the state.

Thanks,

Greg,

I should be able to provide you a KMZ or GIS file shortly.

While we were reviewing all the documents for this matter, we did notice that the previous DNA we had executed is expired.

Would you be able to have the attached NDA executed? It is the same document your firm previously executed.

Thank you,
Alice

Good morning, Alice!

We are less than a month away now from submitting our Section 94-c Application to the State and need the information as soon as possible from you in order to incorporate locations of existing infrastructure into our materials and analyze for potential crossing impacts (and the need for future potential crossing agreements).

If you can please seek the necessary approvals as soon as you can to provide the locations of fiber optic and communication infrastructure in the form of GIS shapefiles, that would be most helpful.

Thank you very much for working to provide us with this important data.

[EXTERNAL SENDER]

Hi Greg,

I am still working on this request. I do need some executive approvals before I can get this information to share.

Thanks,
Alice

Hi Kim,

Just following up – are you able to provide the information in a different format as described below?

Thanks,
Greg Redling
EDR Senior Environmental Analyst

Hi Kim,

Thank you again for providing these maps. Unfortunately, the maps are at a scale that make them too difficult to analyze for our purposes in identifying impacts in our Application to the State.

In the past, EDR has coordinated with Mark M (Cc'd) and Charter has provided shapefiles under the same NDA (see the attached Yellow Barn Solar maps that were provided by Charter in November of last year). Can you provide something similar for the 1-Mile Study Area for the Hoffman Falls Project?

Thanks,
Greg Redling
EDR Senior Environmental Analyst

[EXTERNAL SENDER]

Hi Greg,

Can you confirm to this email that EDR understands and agrees that any information that we will provide is subject to the NDA dated 2-2-22?

Thanks,
Alice

Hi Alice,

I'm following up on the request below for location information pertaining to any existing underground cable, coaxial cable, and fiber optic major transmission telecommunication lines within one mile of the proposed Hoffman Fals Wind Project (see attached map), as well as location information pertaining to any telecommunication infrastructure within five miles. This request is the result of a New York State Executive Law Section 94-c requirement for renewable energy projects.

If possible, please provide location information in the form of GIS Shapefiles or KMZ.

Note that EDR has signed a Non-Disclosure Agreement with Charter/Spectrum (as of February 2, 2022), so this information will be filed under separate cover with the Section 94-c Applications for each project.

Let me know if you have any questions.

Thanks,

Greg Redling

Subject: RE: Telecommunications Infrastructure Data Request

Good afternoon, Ms. Kim,

We had previously consulted with Mark Meyerhofer regarding infrastructure data requests, but it seems that the contact information I have for him is no longer working. Would you be able to help us with the request below?

Thank you very much. Please contact me with any questions.

Thanks,

Megan E. O. Quinn

Subject: RE: Telecommunications Infrastructure Data Request

Good afternoon, Mark,

The Hoffman Falls Wind Project is an up to 100-MW wind energy generating project located in the Towns of Fenner, Smithfield, Nelson, and Eaton, Madison County, New York. As you know, EDR and our clients are required to obtain information regarding major transmission and telecommunication infrastructure in the vicinity of the proposed project, and the NYS Broadband Availability Map indicated that Charter/Spectrum is a telecommunications provider where the project is proposed. In order to provide information required by the Section 94-c regulations, we are respectfully requesting location information pertaining to any existing underground cable, coaxial cable, and fiber optic major transmission telecommunication lines within one mile of the proposed project, as well as location information pertaining to any telecommunication infrastructure within five miles. Please provide location information as either a GIS Shapefile, KMZ, or Adobe PDF.

Note that EDR has signed a Non-Disclosure Agreement with Charter/Spectrum (as of February 2, 2022), so this information will be filed under separate cover with the Section 94-c Applications for each project.

If you have any questions or concerns regarding this request, please feel free to contact me at mquinn@edrdpc.com.

Thanks,

Megan E. O. Quinn
