Cc: Daniel Zvirzdin <<u>dzvirzdin@edrdpc.com</u>> **Subject:** RE: Request for Fiberoptic Mapping

Hi Lisa,

Thank you for your response and providing a map of your communications infrastructure within Madison County. In reviewing the map you've provided, it appears several of your aerial and buried fiber and copper lines intersect, or are very close to, the Proposed Hoffman Falls Wind Facility Site and proposed substation location; however, due to the resolution of the map, we are not able to determine the exact locations of the infrastructure.

Can you please provide a **GIS shapefile or KMZ** of the data previously provided in PDF, so that we can accurately review locations in relation to proposed Facility components?

To clarify, this request is the result of a New York State Executive Law, Section 94-c regulatory requirement, to identify "...all existing underground cable and fiber optic major transmission telecommunication lines within a one-mile radius of the facility..." To the extent that we can identify the locations of existing communications infrastructure within 1-mile of the proposed Facility, these data will be described and shown on maps in Exhibit 20 of our Permit Application and treated confidentially.

Please let me know if you are able to send the requested data. We can coordinate the signing of an NDA if needed.

Thanks, Greg Redling EDR Senior Environmental Analyst

Subject: Request for Fiberoptic Mapping

Good afternoon,

Environmental Design & Research (EDR) is compiling information pertaining to mapping of telecommunications/fiberoptic utilities within 1 mile of the proposed Hoffman Falls Wind Project. Attached, please find a PDF map of the project which we will need mapping of fiberoptic infrastructure for.

Please do not hesitate to contact me with any questions. Thank you,

Mary Luellen EDR Environmental Analyst 274 N. Goodman Street, Suite B260, Rochester, New York 14607 O: 585.271.0040 x230 <u>www.edrdpc.com</u>

60-Day Application Filing Notice

Hoffman Falls Wind LLC – Hoffman Falls Wind Project Madison County, New York

60-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Hoffman Falls Wind LLC, a wholly owned subsidiary of Liberty Renewables Inc. ("Hoffman Falls Wind" or "the Applicant") is proposing to construct the Hoffman Falls Wind Project, a utility-scale wind energy generation facility with up to 100 megawatts ("MW") in generation capacity in the Towns of Fenner, Nelson, Eaton, and Smithfield, Madison County, New York (the "Facility"). This notice announces that on or about January 16, 2024, Hoffman Falls Wind will file an Application with the Office of Renewable Energy Siting ("ORES"), pursuant to Section 94-c of the New York State Executive Law ("the 94-c Process"), seeking a Siting Permit from ORES authorizing the construction and operation of the Facility. The 94-c Process has been implemented by rules enacted by ORES and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and www.ores.ny.gov/regulations.

The Facility is proposed to include up to 24 wind turbines, as well as an associated underground medium voltage collection system, a permanent meteorological (MET) tower, an aircraft detection lighting system (ADLS), temporary construction laydown areas, a concrete batch plant, a medium voltage-to-transmission voltage collection substation, a point of interconnection (POI) switchyard, a short 115-kilovolt (kV) transmission line that will connect the Facility to the high voltage electrical grid, gravel access roads, and an operations and maintenance (O&M) building. The Facility will interconnect to the New York power grid via a point of interconnection (POI) switching station that will connect to the existing Fenner-Cortland 115-kV transmission line, owned, and operated by National Grid. More information on the proposed Facility can be found on the project's dedicated website (https://liberty-renewables.com/hoffmanfallswind/).

The Facility is a zero-emission wind energy facility that will assist the State in meeting the goals of the Climate Leadership and Protection Act and State Energy Plan, which includes obtaining 70% of energy generation from renewable sources by 2030 and significantly reducing greenhouse gas emissions. Other positive impacts of the Facility include the creation of full-time equivalent construction jobs; local spending on accommodations, dining, and other local services during the construction and installation period; payments to landowners; increased revenues to the Towns, County and School Districts; and bill credits paid directly to residential electric customers in the host municipality; and the generation of enough electricity to power approximately 17,968 homes annually, helping New York State to become energy independent. In addition, Hoffman Falls Wind has attempted to minimize impacts associated with the Project, for example, by limiting the disturbance to forested lands, wetlands and streams, and threatened and endangered species to the maximum extent practicable. Hoffman Falls Wind will submit an Application for a Siting Permit that includes extensive studies evaluating the potential impacts. No sooner than three days before the Application is filed, an additional notice will be published announcing the anticipated filing of the Application. This notice is being provided in accordance with 19 NYCRR 900-1.3(d) and is being published at least 60 days prior to the filing of the Application.

Pursuant to 19 NYCRR 900-5, Hoffman Falls Wind will submit with the Application \$1,000 dollars for each MW of capacity for local agencies and potential community intervenors, which for this project, totals \$100,000.00. Any local agency or potential community intervenor can submit a request to the Office for funding within thirty (30) days of the date of the application filing. By regulation, 75% of the local agency account funds shall be reserved for local agencies. Intervenor requests will be made to the Office of Renewable Energy Siting, Attention: Request for Local Agency Account Funding, 99 Washington Avenue, Albany, NY 12231-0001.

Further details regarding the Project and updates on the Application will be provided on <u>https://liberty-renewables.com/hoffmanfallswind</u>. To learn more visit <u>https://liberty-renewables.com/hoffmanfallswind</u>. or contact us at:

This home is one of about 12 that remained standing on Burnet Road in Clay as of Nov. 9. Glenn Coin, gcoin@syracuse.com

MICRON

Habitat for Humanity removed reusable items from the homes

Continues from A1

and Caughdenoy Road, in the White Pine Commerce Park, where Micron plans to build.

Utilities have been shut off to the homes. Syracuse Habitat for Humanity has removed and sold reusable items such as doors, windows and fixtures.

As the homes on Burnet have gradually emptied over the past couple of years, the street has been plagued with trespassing, vandalism and drug use.

In May, the agency issued a news release warning people to stay away from the entire 1,400-acre area, known as White Pine Commerce Park.

"Despite the press release, reports of trespass, theft and illegal activities have increased, creating a public safety concern for remaining residents," said OCIDA lawyer Jeff Davis.

At least eight deputies and the sheriff's helicopter, Air One, responded to the party at 8447 Burnet Road on Oct. 27, said Tom Newton, spokesman for the sheriff's office. Many of the teens fled into the woods, but some were caught and held until their parents came to get them, he said.

Petrovich said the agency had urged the sheriff's department to issue "stern warnings," when confronting people illegally on OCIDA property, but that wasn't sufficient. He said he got a call at 11 p.m. Oct. 27 from the sheriff's department asking what he wanted to do.

"I said, Let's press charges," Petrovich said. "At some point, you've got to take action."

No one has been charged, Newton said, but the case remains open and charges could still be brought.

The District Attorney's office has prosecuted no incidents of any kind on Burnet Road this year, said Joseph Coolican, first chief assistant district attorney.

OCIDA paid \$1 million for the two-story house where the Oct. 27 party was held. The 2,600-square-foot house was built in 2020, according to county property records. It has been torn down.

Petrovich said thieves have stolen generators and power tools from Gorick.

Deputies have increased their patrols on Burnet and other parts of White Pine, Newton and Petrovich said. THE POST-STANDARD TUESDAY, NOVEMBER 14, 2023 A5

Hoffman Falls Wind LLC – Hoffman Falls Wind Project Madison County, New York 60-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Hoffman Falls Wind LLC, a wholly owned subsidiary of Liberty Renewables Inc. ("Hoffman Falls Wind" or "the Applicant") is proposing to construct the Hoffman Falls Wind Project, a utility-scale wind energy generation facility with up to 100 megawatts ("MW") in generation capacity in the Towns of Fenner, Nelson, Eaton, and Smithfield, Madison County, New York (the "Facility"). This notice announces that on or about January 16, 2024, Hoffman Falls Wind will file an Application with the Office of Renewable Energy Siting ("ORES"), pursuant to Section 94-c of the New York State Executive Law ("the 94-c Process"), seeking a Siting Permit from ORES authorizing the construction and operation of the Facility. The 94-c Process has been implemented by rules enacted by ORES and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and <u>www.ores.ny.gov/regulations</u>.

The Facility is proposed to include up to 24 wind turbines, as well as an associated underground medium voltage collection system, a permanent meteorological (MET) tower, an aircraft detection lighting system (ADLS), temporary construction laydown areas, a concrete batch plant, a medium voltage-to-transmission voltage collection substation, a point of interconnection (POI) switchyard, a short 115-kilovolt (kV) transmission line that will connect the Facility to the high voltage electrical grid, gravel access roads, and an operations and maintenance (O&M) building. The Facility will interconnect to the New York power grid via a point of interconnection (POI) switching station that will connect to the existing Fenner-Cortland 115-kV transmission line, owned, and operated by National Grid. More information on the proposed Facility can be found on the project's dedicated website (<u>https://liberty-renewables.com/hoffmanfallswind/</u>).

The Facility is a zero-emission wind energy facility that will assist the State in meeting the goals of the Climate Leadership and Protection Act and State Energy Plan, which includes obtaining 70% of energy generation from renewable sources by 2030 and significantly reducing greenhouse gas emissions. Jewish Americans serving in Israel

Some head overseas to fight Hamas after attacks

Phaedra Trethan

USA TODAY

Michael Freund says he is not getting a lot of sleep lately.

A columnist with The Jerusalem Post and former deputy communications director for Benjamin Netanyahu, Freund, like a lot of other Jewish Americans, was horrified by Hamas' Oct. 7 attack on Israeli border communities that left 1,400 people dead.

But there's something, or someone, else keeping him up at night. Five someones, actually.

All of Michael Freund's sons are serving in the Israeli military, a conscripted military service made up of more than 169,000 troops.

"It's been a very difficult time," Freund told USA TODAY. "But I am very proud of them for doing their duty to protect Israel, the land and the country and the people."

It's unclear how many dual citizens and Americans are serving in Israel. The Israeli military, Israeli Foreign Ministry, Interior Ministry and Prime Minister's Office all told USA TODAY they are not tracking that information. But Freund said the attacks ignited a collective sense of urgency to unite against an enemy bent on Israel's destruction.

["]It's a stressful time for everyone," said Freund, a New York native who lived in Israel for several years before returning to the U.S. temporarily. "Everyone knows someone or is within a couple degrees of separation to someone who was killed or injured or kidnapped (on Oct. 7)."

American identities but a 'strong sense of civic duty'

Freund's sons grew up mostly in Israel and hold dual citizenship there and in the U.S., where they would spend weeks each summer at camp and visiting family. His youngest was already in the midst of his mandatory military service, and his other sons are reservists who were called up after the Hamas attacks.

Two of Freund's older sons are married, and one has a child.

But asked if he felt any ambivalence about his sons' service, Freund didn't hesitate.

"Absolutely not," he said. Serving one's country is "a duty and a responsibility, and in times of national crisis every person has to step forward and contribute as best they can. I did what I can to raise them with strong sense of civic duty toward their country and their fellow Jews." "It's a stressful time for everyone. Everyone knows someone or is within a couple degrees of separation to someone who was killed or injured or kidnapped (on Oct. 7)." Michael Freund

delphia and is a volunteer and board member with the Lower Merion Fire Department's Penn Wynne-Overbrook Hills Fire Company.

"People are talking a lot about the war aspect," he said. "But there's a people aspect of this as well."

Balaban went to Israel shortly after war broke out and was preparing to return the day after he spoke with USA TODAY. Balaban, CEO of the Jewish Hoffman Falls Wind LLC – Hoffman Falls Wind Project Madison County, New York

60-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Hoffman Falls Wind LLC, a wholly owned subsidiary of Liberty Renewables Inc. ("Hoffman Falls Wind" or "the Applicant") is proposing to construct the Hoffman Falls Wind Project, a utility-scale wind energy generation facility with up to 100 megawatts ("MW") in generation capacity in the Towns of Fenner, Nelson, Eaton, and Smithfield, Madison County, New York (the "Facility"). This notice announces that on or about January 16, 2024, Hoffman Falls Wind will file an Application with the Office of Renewable Energy Siting ("ORES"), pursuant to Section 94-c of the New York State Executive Law ("the 94-c Process"), seeking a Siting Permit from ORES authorizing the construction and operation of the Facility. The 94-c Process has been implemented by rules enacted by ORES and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and <u>www.ores.ny.gov/regulations</u>.

The Facility is proposed to include up to 24 wind turbines, as well as an associated underground medium voltage collection system, a permanent meteorological (MET) tower, an aircraft detection lighting system (ADLS), temporary construction laydown areas, a concrete batch plant, a medium voltage-to-transmission voltage collection substation, a point of interconnection (POI) switchyard, a short 115-kilovolt (kV) transmission line that will connect the Facility to the high voltage electrical grid, gravel access roads, and an operations and maintenance (O&M) building. The Facility will interconnect to the New York power grid via a point of interconnection (POI) switching station that will connect to the existing Fenner-Cortland 115-kV transmission line, owned, and operated by National Grid. More information on the proposed Facility can be found on the project's dedicated website (https://liberty-renewables.com/hoffmanfallswind/). The Facility is a zero-emission wind energy facility that will assist the State in meeting the goals of the Climate Leadership and Protection Act and State Energy Plan, which includes obtaining 70% of energy generation from renewable sources by 2030 and significantly reducing greenhouse gas emissions. Other positive impacts of the Facility include the creation of fulltime equivalent construction jobs; local spending on accommodations, dining, and other local services during the construction and installation period; payments to landowners; increased revenues to the Towns, County and School Districts; and bill credits paid directly to residential electric customers in the host municipality; and the generation of enough electricity to power approximately 17,968 homes annually, helping New York State to become energy independent. Hoffman Falls Wind will submit an Application for a Siting Permit that includes extensive studies evaluating the potential impacts associated with the Facility and identified methods which have been agreed to be implemented to avoid, minimize, and mitigate potential impacts. No sooner than three days before the Application is filed, an additional notice will be published announcing the anticipated filing of the Application. This notice is being provided in accordance with 19 NYCRR 900-1.3(d) and is being published at least 60 days prior to the filing of the Application.

Michael Balaban and a group from the Emergency Volunteer Project are going to Israel to help fill the void left by first responders, medical professionals and others who are serving in the Israeli military or who have been killed or injured during the war. COURTESY MICHAEL BALABAN

A sister's service makes brother proud

Yosef Lazar said his sister, one of 12 Lazar children, was always "a very girly girl." But when she enlisted in the Israeli military at 19, he said, Sara Lazar became a soldier's soldier, proud to be one of the few women serving in a combat unit.

Growing up in Brooklyn, Sara talked for years about going to Israel and joining its military, her brother remembered. "But being my sister, I thought she was nuts. Then at 19, she was like, 'OK, I'm going for real.'"

Her family worried she might come back a different person.

"When she's in our house in America, she's always wearing jewelry and wants to look her best," Yosef said. "But then there's this opposite side to her that she shows (in the military)."

Sara served 18 months in the Israeli military and came home "still herself, that girly girl," said her brother, who recently moved from New Jersey to Florida.

When Hamas attacked Israel, though, Sara was determined to go back, two years after her initial service ended.

"The second after our holiday ended, she was ready to hop on a plane," Yosef said. "She was like, 'I'm ready to go, and they need me.' "He wasn't sure she was serious, but when the siblings connected, she was already on the way.

Their parents initially tried to talk Sara out of going back, worried about her safety. "Obviously, they're protective like any parents," Yosef said, but they support her.

Going not to fight Hamas, but to help Israelis

Michael Balaban lives outside Phila-

Federation of Greater Philadelphia, met with top-level politicians and families of victims of the Oct. 7 attacks. He visited hospitals to talk to wounded soldiers and met with federation members and staff who were already in Israel.

As Israeli first responders were called up for military service, or were killed or wounded in the Hamas attacks, first responders from the U.S. rushed to fill the void, Balaban said.

He's working with the Emergency Volunteer Project, which deploys volunteer doctors, nurses, EMTs and firefighters to Israel during crises. At least 55 firefighters have gone to Israel, and another deployment was preparing to go within the next several days. The Jewish Federation of Greater Philadelphia is funding at least one deployment.

He wants people in the U.S., and everywhere else, to know the true source of the conflict.

"I don't know anyone in Israel who believes residents of Gaza shouldn't be able to live a productive, prosperous and peaceful life, but they can't do it as long as they are under authority of Hamas," he said. He called civilian deaths and the humanitarian crisis unfolding in the territory "tragic."

He's taking a group of 15 clergy members to meet with and counsel victims of violence and their families, and people who have been displaced or barely escaped the horrors Hamas wrought at places like Kfar Aza and Be'eri, two of the kibbutzim brutally attacked on Oct. 7.

Family members, including their adult children, are worried as Balaban and his wife go to Israel. But, he said, "they know the role we play in our community."

Contributing: Kim Hjelmgaard

Pursuant to 19 NYCRR 900-5, Hoffman Falls Wind will submit with the Application \$1,000 dollars for each MW of capacity for local agencies and potential community intervenors, which for this project, totals \$100,000.00. Any local agency or potential community intervenor can submit a request to the Office for funding within thirty (30) days of the date of the application filing. By regulation, 75% of the local agency account funds shall be reserved for local agencies. Intervenor requests will be made to the Office of Renewable Energy Siting, Attention: Request for Local Agency Account Funding, 99 Washington Avenue, Albany, NY 12231-0001.

Further details regarding the Project and updates on the Application will be provided on <u>https://liberty-renewables.com/hoffmanfallswind</u>. To learn more visit <u>https://liberty-renewables.com/hoffmanfallswind</u>. or contact us at:

Hoffman Falls Wind LLC – Hoffman Falls Wind Project Madison County, New York

60-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Hoffman Falls Wind LLC, a wholly owned subsidiary of Liberty Renewables Inc. ("Hoffman Falls Wind" or "the Applicant") is proposing to construct the Hoffman Falls Wind Project, a utility-scale wind energy generation facility with up to 100 megawatts ("MW") in generation capacity in the Towns of Fenner, Nelson, Eaton, and Smithfield, Madison County, New York (the "Facility"). This notice announces that on or about January 16, 2024, Hoffman Falls Wind will file an Application with the Office of Renewable Energy Siting ("ORES"), pursuant to Section 94-c of the New York State Executive Law ("the 94-c Process"), seeking a Siting Permit from ORES authorizing the construction and operation of the Facility. The 94-c Process has been implemented by rules enacted by ORES and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and www.ores. ny.gov/regulations.

The Facility is proposed to include up to 24 wind turbines, as well as an associated underground medium voltage collection system, a permanent meteorological (MET) tower, an aircraft detection lighting system (ADLS), temporary construction laydown areas, a concrete batch plant, a medium voltage-to-transmission voltage collection substation, a point of interconnection (POI) switchyard, a short 115-kilovolt (kV) transmission line that will connect the Facility to the high voltage electrical grid. gravel access roads, and an operations and maintenance (O&M) building. The Facility will interconnect to the New York power grid via a point of interconnection (POI) switching station that will connect to the existing Fenner-Cortland 115-kV transmission line, owned, and operated by National Grid. More information on the proposed Facility can be found on the project's dedicated website (https://liberty-renewables. com/hoffmanfallswind/).

The Facility is a zero-emission wind energy facility that will assist the State in meeting the goals of the Climate Leadership and Protection Act and State Energy Plan, which includes obtaining 70% of energy generation from renewable sources by 2030 and significantly reducing greenhouse gas emissions. Other positive impacts of the Facility include the creation of full-time equivalent construction jobs; local spending on accommodations, dining, and other local services during the construction and installation period; payments to landowners; increased revenues to the Towns, County and School Districts; and bill credits paid directly to residential electric customers in the host municipality; and the generation of enough electricity to power approximately 17,968 homes annually, helping New York State to become energy independent. In addition, Hoffman Falls Wind has attempted to minimize impacts associated with the Project, for example, by limiting the disturbance to forested lands, wetlands and streams, and threatened and endangered species to the maximum extent practicable. Hoffman Falls Wind will submit an Application for a Siting Permit that includes extensive studies evaluating the potential impacts associated with the Facility and identified methods which have been agreed to be implemented to avoid, minimize, and mitigate potential impacts. No sooner than three days before the Application is filed, an additional notice will be published announcing the anticipated filing of the Application. This notice is being provided in accordance with 19 NYCRR 900-1.3(d) and is being published at least 60 days prior to the filing of the Application.

Hi, Neighbor Pennysaver, Madison County, NY, November 13, 2023-9

3-Day Application Filing Notice

Hoffman Falls Wind LLC – Hoffman Falls Wind Project Madison County, New York

3-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Hoffman Falls Wind LLC, a wholly owned subsidiary of Liberty Renewables Inc. ("Hoffman Falls Wind" or "the Applicant") is proposing to construct the Hoffman Falls Wind Project, a utility-scale wind energy generation facility with up to 100 megawatts ("MW") in generation capacity in the Towns of Fenner, Nelson, Eaton, and Smithfield, Madison County, New York (the "Facility"). This notice announces that on or about February 12, 2024, Hoffman Falls Wind will file an Application with the Office of Renewable Energy Siting ("ORES"), pursuant to Section 94-c of the New York State Executive Law ("the 94-c Process"), seeking a Siting Permit from ORES authorizing the construction and operation of the Facility. The 94-c Process has been implemented by rules enacted by ORES and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and www.ores.ny.gov/regulations.

The Facility is proposed to include up to 24 wind turbines, as well as an associated underground medium voltage collection system, a permanent meteorological (MET) tower, an aircraft detection lighting system (ADLS), temporary construction laydown areas, a temporary concrete batch plant, a medium voltage-to-transmission voltage collection substation, a point of interconnection (POI) switchyard, a short 115- kilovolt (kV) gen-tie line that will connect the Facility to the high voltage electrical grid, gravel access roads, and an operations and maintenance (O&M) building. The Facility will interconnect to the New York power grid via a point of interconnection (POI) switching station that will connect to the existing Fenner-Cortland 115-kV transmission line, owned, and operated by National Grid. More information on the proposed Facility can be found on the project's dedicated website (https://liberty-renewables.com/hoffmanfallswind/).

The Facility is a zero-emission wind energy facility that will assist the State in meeting the goals of the Climate Leadership and Protection Act and State Energy Plan, which includes obtaining 70% of energy generation from renewable sources by 2030 and significantly reducing greenhouse gas emissions. Other positive impacts of the Facility include the creation of full-time equivalent construction jobs; local spending on accommodations, dining, and other local services during the construction and installation period; payments to landowners; increased revenues to the Towns, County and School Districts; and bill credits paid directly to residential electric customers in the host municipality; and the generation of enough electricity to power approximately 17,968 homes annually, helping New York State to become energy independent. In addition, Hoffman Falls Wind has attempted to minimize impacts associated with the Project, for example, by limiting the disturbance to forested lands, wetlands and streams, and threatened and endangered species to the maximum extent practicable. Hoffman Falls Wind will submit an Application for a Siting Permit that includes extensive studies evaluating the potential impacts. No sooner than three days before the Application is filed, an additional notice will be published announcing the anticipated filing of the Application. This notice is being provided in accordance with 19 NYCRR 900-1.3(d) and is being published at least 60 days prior to the filing of the Application.

Pursuant to 19 NYCRR 900-5, Hoffman Falls Wind will submit with the Application \$1,000 dollars for each MW of capacity for local agencies and potential community intervenors, which for this project, totals \$100,000.00. Any local agency or potential community intervenor can submit a request to the Office for funding within thirty (30) days of the date of the application filing. By regulation, 75% of the local agency account funds shall be reserved for local agencies. Intervenor requests may be made by mail to the Office of Renewable Energy Siting, Attention: Local Agency Account Funding Request (Matter No. 23-00038), c/o OGS Mailroom, Empire State Plaza, 240 State Street, P-1 South, J Dock, Albany, NY 12242, or by email to hearings@ores.ny.gov, Subject line "Local Agency Account Funding Request (Matter No. 23-00038)."

Further details regarding the Project and updates on the Application will be provided on https://libertyrenewables.com/hoffmanfallswind or the ORES website, https://ores.ny.gov/permit-applications under Matter No. 23-00038. Printed and electronic copies of the Application, when filed, will be available for review at the following local document repositories: Sullivan Free Library, 101 Falls Boulevard, Chittenango, NY 13037, and Morrisville Public Library, 83 East Main Street, Morrisville, NY 13408.
